Organic Farm

Uses water to irrigate crops, shoo away potential pests and maintain compost systems. May also collect winter rainwater for summer crops.

Residential Water User

Uses water to flush toilets, clean clothes & dishes, water plants in and out of the house and a many other uses.

Barber Shop / Hair Salon

Uses water to clean hair cutting and styling tools.

Fire Department

Uses water to extinguish fires and to dilute or disperse toxic spills.

Dairy Farm

Uses water to grow food and provide drinking water for cows, and to sanitize milking equipment and stalls.

Street Cleaner

Uses water to scrub up oil, litter and other materials from city streets.

Coal-fired Power Plant

Burns coal to boil water into steam, which then turns turbines to create electricity.

Restaurant

Uses water to cook meals, clean the kitchen, wash tables, mop floors and keep plants green inside and outside of the restaurant.

Water Theme Park

Enjoys sliding through tubes of cool water and splashing around on other fun rides on hot summer days.

Waste Water Treatment Plant

Uses water and power to transport waste water materials to processing plant and to remove the waste by filtering, digesting & evaporation of the water.
