## Fish Farm

Uses water to raise fish to maturity in rearing ponds, and to carry waste from the ponds.

## Janitorial Business

Uses water to clean surfaces, wash windows and steam carpets in office buildings.

## Ranch

Uses water to grow food and provide drinking water for livestock, and to clean their areas for living and feeding, transporting waste to holding ponds.

## Tour Boat Business

Relies on scenic waterways to attract and convey passengers.

## Vegetation

Plants use water for photosynthesis, to keep cool by transpiration and to transport nutrients to other parts of the plant.

## Fishing Enthusiasts

Enjoys casting line into ponds, slow- moving pools and another other body of water in quest of big fish!

## Aquatic Insects

Thrives in various water environments and provide the food source for many other organisms living in riparian and aquatic environments.

## Scuba Diving Business

Enjoys hunting for edible sea creatures or just simply exploring the wonders of underwater environments.

## Fish

Trout, salmon, catfish are among a diversity of fish species living in water, eating organisms that live in water - or being eaten by other creatures.

## Aquatic Mammals

Beavers, muskrats and otters depend on riparian and aquatic environments to locate food and shelter.
