

QUESTIONS: *'Summary of Estimated Water Use in the United States in 2015'*
USGS Fact Sheet 2018-3035

1. How does the water withdrawn for use in the United States in 2015 compare to that withdrawn in 2010?
2. What states are withdrawing the most water? What is most of the water in these states being used for?
3. What factors may be the cause of these 4 states withdrawing so much water?
4. Review the bar graph on page 2. How does the use of water differ in states west of the Mississippi River versus states to the east?
5. What factors may be involved in causing the differences between the eastern and western United States?
