

# Project WET Workshop

# CLIMATE CHANGE

## and

# CALIFORNIA WATER

## Saturday, Jan. 24, 2026

The California Department of Water Resources (DWR), Marin Water, and Water Education Foundation's California Project WET program invite educators working with students in grades 3 through 12 to join us for a special workshop on climate change and its impact on California's water resources.

Understanding climate change and its link to flood, drought, water quality, and more is crucial for all Californians. In this workshop, you will interact with DWR climate experts and engage in activities that will help your students understand the impacts of climate change on water and how to adapt to our changing environment.

Project WET activities are designed to engage students in the study of water through interactive simulations, use of models, and reality-based scenarios. The interdisciplinary activities supplement existing curriculum, are correlated to Common Core and Next Generation Science Standards, and provide strong foundations for STEAM, Project-Based, and Service-Learning programs.

**For a \$25 registration fee, participants will receive a copy of the Project WET Foundations of Water Education guide, a continental breakfast and lunch, an opportunity to receive 0.8 CEU credit - and a \$120 stipend following completion of the workshop!**

**Saturday, Jan. 24, 2026**  
**8:00 am to 4:00 pm**

Marin Water Administrative Building  
Mt. Tamalpais Room  
220 Nellen Avenue  
Corte Madera, CA 94925

Registration is limited to first 30 individuals to register. Additional registrants will be placed on a waiting list.

**Registration closes**  
**Friday, January 16, 2026**
