

Project WET Workshop

CLIMATE CHANGE

and

CALIFORNIA WATER

Saturday, February 18, 2023

Join the California Department of Water Resources, Environmental Volunteers and Project WET for a special workshop on climate change and its impact on California's water resources.

Understanding climate change and its link to flood, drought, water quality, and more is crucial for all Californians. In this special workshop, you will learn activities to use with your students to help them understand the impacts of climate change on water and steps they can take to adapt to our changing environment.

Project WET activities are designed to engage students in the study of water through interactive simulations, use of models, and reality-based scenarios. The interdisciplinary activities supplement existing curriculum, are correlated to Common Core and Next Generation Science Standards, and provide strong foundations for STEAM, Project-Based, and Service-Learning programs.

For a \$20 registration fee, participants will receive a wealth of current information on climate science and its application, an opportunity to interact with DWR Climate research staff, a copy of Project WET Guide 2.0, breakfast and lunch provided by Environmental Volunteers, an opportunity to receive 0.8 CEU credit - plus a \$100 stipend and return of your registration fee minus Eventbrite fees following completion of the workshop!

**Saturday, Feb. 18, 2023
(8:00 am to 4:00 pm)**

Environmental
Volunteers EcoCenter
2560 Embarcadero Rd.
Palo Alto, CA 94303

Registration is limited to the first 30 to register. Remainder will be added to a waiting list.

**Registration closes Friday
February 10, 2023**
