

DWR Climate Change Team and Project WET present

'Understanding Climate Change in California'

Climate change is having a profound impact on California water resources, as evidenced by long-term changes in snowpack, sea level, river flows and annual temperatures. Join the Department of Water Resources (DWR) Climate Change Team for a day learning about the science evidence of climate change, how local to Federal water managers are using the science to safeguard California's water supply and engineer more climate resilient communities – and how the interdisciplinary activities of Project WET can help you integrate climate change science knowledge, concepts and skills back in the classroom!

Project WET (Water Education for Teachers) activities are designed to engage students of all ages - in formal and non-formal education settings - in the study of water through interactive simulations, use of models and reality-based scenarios. Interdisciplinary Project WET activities supplement existing curriculum and are correlated to and reinforce practices integrated within Common Core and Next Generation Science Standards - provide strong foundations for STEAM, Project-Based and Service Learning programs.

Participants attending this training will receive great information on current climate science, how the science is being applied to increase the resiliency of California water systems, a copy of Project WET Guide 2.0, experiences with Project WET activities, an opportunity to receive 0.8 CEU credit - and a \$50 stipend after completion of the training! Please bring your own lunch!

Saturday, June 16, 2018 (8:00 am to 4:00 pm)
CSU Long Beach - HSCI-281
(Hall of Science Building, room 281)
1250 Bellflower Blvd,
Long Beach, CA 90840

To reserve your spot, please email your name, email, job title, grade level (s) you work with and home address to scied@csulb.edu. Please contact Brian Brown, California Project WET Coordinator if you have questions about the workshop.

REGISTRATION WILL CLOSE FRIDAY, JUNE 8, 2018!
