

The 2019 Sacramento River Floodplain Ecology Institute for Educators

The Sacramento River is the life-blood of California. Join us for three days this summer to learn about this amazing resource, the agencies that manage it, and the issues facing it. Learn how to use the Sacramento River to create place-based, NGSS lessons to use at every grade level. Experience rafting through some of the most dynamic stretches of the river between Red Bluff and Los Molinos. Meet new friends and network with agency professionals. Come away with contacts and resources to enhance your program! Earn a \$200 stipend for your participation.

1: 2018 Lunch Stop on the Sacramento River

- DAY 1** Project WET Certification and the new NGSS-aligned WET 2.0 Curriculum Guide.
- DAY 2** Float the Sacramento River from Red Bluff to Los Molinos with agency professionals to learn about restoration and management strategies. View bald eagles, bank swallows, osprey, and many other natural phenomena!
 - Network: priceless contacts and valuable connections to other teachers of science.
- DAY 3** Visit the Chico Creek Nature Center to learn activities that can be taught in your own school yard.
 - Planning time to design your own NGSS lesson.

Additional Details:

Teacher Stipend \$200 for all days/fall included (must attend all days – stipend is not prorated).

2 units of credit available for purchase (\$60/ea).

Registration fee = \$75
