

Project WET Workshop

CLIMATE CHANGE

and

CALIFORNIA WATER

Saturday Sept. 30, 2023

Join the California Department of Water Resources, Blue Lake Rancheria & Tribal Education Agency and California Project WET for a special workshop on climate change and its impact on California's water resources.

Understanding climate change and its link to flood, drought, water quality, and more is crucial for all Californians. In this special workshop, you will learn activities to use with your students to help them understand the impacts of climate change on water and steps they can take to adapt to our changing environment.

Project WET activities are designed to engage students in the study of water through interactive simulations, use of models, and reality-based scenarios. The interdisciplinary activities supplement existing curriculum, are correlated to Common Core and Next Generation Science Standards, and provide strong foundations for STEAM, Project-Based, and Service-Learning programs.

Participants will receive a wealth of current information on climate science and its application, an opportunity to interact with DWR Climate research staff, a copy of Project WET Guide 2.0, breakfast & lunch, an opportunity to receive 0.8 CEU credit - and a \$100 stipend following completion of the workshop!

Saturday Sept. 30, 2023
(8:00 am to 4:00 pm)

Blue Lake Rancheria
777 Casino Way
Blue Lake, CA 95525

Registration is limited to the first 30 to register. Remainder will be added to a waiting list.

Registration closes
Friday September 22, 2023

Contact Brian Brown,
California Project WET Coordinator
at (916) 444-6240 or
projectwet@watereducation.org
for questions.
