

Project WET Workshop

CLIMATE CHANGE

and

CALIFORNIA WATER

Saturday, October 22, 2022

Join the California Department of Water Resources and Project WET for a special workshop on climate change and its impact on California's water resources.

Understanding climate change and its link to flood, drought, water quality, and more is crucial for all Californians. In this special workshop, you will learn activities to use with your students to help them understand the impacts of climate change on water and steps they can take to adapt to our changing environment.

Project WET activities are designed to engage students in the study of water through interactive simulations, use of models, and reality-based scenarios. The interdisciplinary activities supplement existing curriculum, are correlated to Common Core and Next Generation Science Standards, and provide strong foundations for STEAM, Project-Based, and Service-Learning programs.

For a refundable \$20 registration fee, participants in this workshop will receive accurate information on current climate science, how the science is being applied to increase the resiliency of California water systems, a copy of Project WET Guide 2.0, and an opportunity to receive 0.8 CEU credit. Breakfast and lunch are provided - and a \$100 stipend following completion of the training!

**Saturday, Oct. 22, 2022
(8:00 am to 4:00 pm)**

Pacific Grove Museum
of Natural History
165 Forest Avenue
Pacific Grove, CA 93950

Registration is limited to the first 20 to register. Remainder will be added to a waiting list.

**Registration closes Friday
October 14, 2022**
