

# Please join us this Fall!

## Project WET Workshop

### November 2, 2019

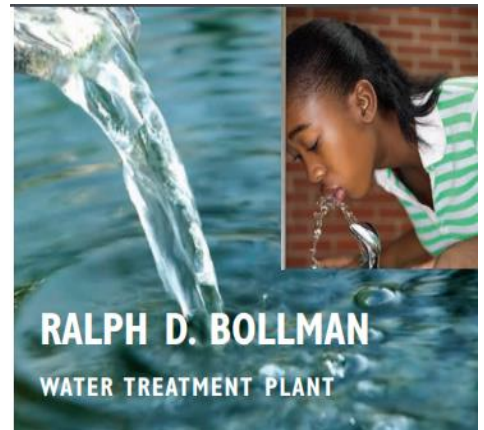

The Contra Costa County Water District invites you to this wonderful hands-on training combined with a tour of a state-of-the-art water treatment plant! Participants will experience activities that engage students in the study of all aspects of water, including water conservation and quality. Project WET (**Water Education for Teachers**) activities are designed to supplement existing curriculum and each incorporates nationally recognized education principles and practices.

The interdisciplinary Project WET activities are correlated to **Common Core** and **Next Generation Science Standards** and are an effective tool for integrating student knowledge of water resources with activities that include simulations and real-life scenarios that provide strong foundations for STEAM and Service-Learning programs. Project WET activities are designed to support and enhance other curricula, including EEI (**Education & the Environment Initiative**) units.

Each participant will receive: *Hands-on experience with great water conservation activities, a copy of the Project WET Guide 2.0 which includes free access to over 110 Project WET activities and detailed NGSS correlation, lunch, water treatment plant tour and an opportunity to receive CEU credits!*

**Saturday, November 2, 2019 (9:30- 4:00)**  
**Ralph D. Bollman Water Treatment Plant**  
**2015 Bates Ave**  
**Concord, CA 94520**

To reserve your spot, please e-mail the information below to Justin Fivella, Education Coordinator, Contra Costa Water District at: [jfivella@ccwater.com](mailto:jfivella@ccwater.com)
