

..... PROJECT WET

HANDS-ON WORKSHOP

for Orange County Educators

.....

Bring water education to life with classroom-ready resources!

Project WET, the Municipal Water District of Orange County, and Moulton Niguel Water District invite ALL Orange County educators to an engaging, hands-on professional development workshop that brings water education to life. Explore water conservation, water's physical properties, and watershed stewardship through interactive, standards-aligned activities (Common Core & NGSS) you can immediately implement in your classroom. Gain practical tools to support STEAM, project-based, and service learning while empowering students to understand where their water comes from and their role in protecting it.

WHAT TEACHERS ARE SAYING...

“ Love the engagement, hands-on activities and connections to our local community.

Participating in the actual lessons made it so much more impactful! I loved engaging with the materials and discussing the various ways we can expand on the activities or change themes to fit our student's needs. ”
