Drought and the Delta

TUESDAY, OCTOBER 25, 2016

**Stockton Memorial Civic Auditorium
525 N Center Street
Stockton, CA**

WATER EDUCATION
FOUNDATION

Sponsored by

SACRAMENTO - SAN JOAQUIN
DELTA CONSERVANCY
A California State Agency

Five years of drought have severely taxed California's rivers, reservoirs and groundwater. Irrigation supplies have been cut – in some regions farmers have received zero surface water. Cities have imposed strict voluntary and mandatory water conservation measures. The reduced precipitation and record warm temperatures have had a major impact on the state's forests, with millions of dead trees. Low instream flows and warm water have decimated populations of Chinook salmon.

The Sacramento-San Joaquin Delta – the hub of California's water supply, an agricultural center and a crucial ecological resource – hasn't been immune from the impacts of the prolonged drought. This **FREE one-day briefing** will discuss the drought's effects on the Delta.

Topics include:

- Drought and the Delta smelt and Chinook salmon
- Drought and Delta farming/water supply impacts
- Drought and the Delta ecosystem
- Drought and Delta water quality

Speakers Include:

Jay Lund, Director of the UC Center for Watershed Sciences
Michael Patrick George, Delta Watermaster
Michelle Banonis, Manager of the Bureau of Reclamation's Bay-Delta Office

This briefing is for water district managers and board members, state and federal agency officials, city and county government officials, farmers, environmentalists, attorneys, consultants, engineers, business executives and public interest groups.

*Check-in begins at 9 a.m. The program will run from 9:30 a.m. to 4:00 p.m.
Complimentary coffee will be served and a box lunch will be provided.*

**Seating is limited!
