# Color a Watershed: Future Development

1. Analyzing Map C, what effect(s) may the human settlement have on the watershed?
2. What effect(s) might a changing climate have on the human settlement and the watershed in Map C?
3. What effect(s) might a changing climate have had on the human settlement and the watershed in Maps A and B?
4. Where would you likely find communities/people vulnerable to a changing climate on Map C? What are the vulnerabilities you are considering?
5. What are some potential strategies to better protect these communities in a changing climate?
6. What would your team recommend as a future design to ease our human impacts and the impacts of a changing climate on the human and natural communities for this part of the watershed?
