

# Sacramento-San Joaquin DELTA

# Wicked Problem

- A problem that is difficult or impossible to solve because of **incomplete, contradictory, and changing requirements that are often difficult to recognize.**
  - Involves many stakeholders, who all will have different ideas about what the problem really is and what its causes are.
  - Cannot be solved in a traditional linear fashion because the problem definition evolves as new possible solutions are considered and/or implemented.
- **Strategy: Create a shared understanding of the problem and foster a joint commitment and possible ways to resolving it.**

# The Coequal Goals

## Water Supply

“Providing a more reliable water supply for California”

## Delta Ecosystem

“Protecting, restoring, and enhancing the Delta ecosystem”

---

## Delta as a Place

“The coequal goals shall be achieved in a manner that protects and enhances the unique cultural, recreational, natural resource, and agricultural values of the Delta as an evolving place”
